

# PM-900M

## Bolting machine

### Flour bolting machine PM-900M:

- The machine is intended for bolting of flour with the moisture content 15% or less. This machine helps to separate flour from rubbish, make the flour loose and aerate it. The separation from the tramp iron is done with fishing magnets.

- The bolting unit of the machine is located from below. The machine is equipped with tip-up hopper for easy cleaning and replacement of the flour bolter.

- The machine provides the loading of sifted product into pots with height up to 920 mm, including 330 litre bowls.

- The machine has all the necessary certificates.  
Spare parts, tools and accessories are in the set.

### Technical features:

Output, kg/hour, no more than	
- technical	3500
- operating	2500
Nominal power consumption, kW	1,8
Nominal voltage, V	3NPE~380
Overall dimensions, mm, no more than:	1100x630x1500
Weight, kg, no more than	155
